

NGGE90FP, GE90 Full Engine Pedestal Set

The NextGen AeroSupport GE90 Full Engine Pedestal Set supports the engine at the Lower Fan Case and Turbine Rear Frame Ground Handling Mounts. The Pedestal frames and support tubes are of steel construction with Skydrol resistant paint. All engine interfaces are stainless steel. Turnbuckles are included between the forward and aft pedestals sets. Wheels are included for local manual movement. Threaded shafts and nuts are included for vertical adjustments.
